

The automatic cleaner that really cleans.

Packed with more than 200 improvements, this second generation Trilobite 2.0 is a leap forward in automatic cleaning. With a new programmable timer, smart stair sensor and automatic recharging system, you barely have to lift a finger. And with Electrolux's vacuum cleaning expertise, you can count on superior cleaning performance.

A cleaner way to live

- Improved home hygiene due to regular automatic cleaning
- No need for frequent manual vacuuming
- Superb pick-up due to robust brush-roll and suction system
- Gets up even micro particles, animal hair and crumbs
- Dust is prevented from escaping thanks to high-grade micro-filter
- Dust container includes electronic dust level indicator

An easier way to live

- New programmable timer lets you set time and day for cleaning
- Stair sensor prevents machine from falling down the stairs
- Fully automatic recharging - your machine is always ready to go
- When needed, Trilobite finds its way back to the charger in order to recharge and complete the job
- Gets under low objects like tables and sofas
- Cable protection system prevents cords from being harmed
- Clear LED display provides information and settings
- Ultrasound system detects obstacles and enables smooth manoeuvring

A proven success story

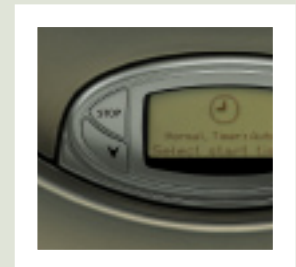

- Electrolux introduced world's first domestic automatic cleaner in 2001
- More than 90 percent customer satisfaction in studies
- Second-generation machine (Trilobite 2.0) is packed with more than 200 improvements
- Technology meets high standards of Electrolux vacuum cleaning

Superior cleaning thanks to powerful brush-roll and suction system
